

Cisco Check Point to ASA Firewall Configuration Migration Service

IMPROVE ACCURACY, EFFICIENCY, AND NETWORK UPTIME WHEN MIGRATING TO A CISCO ADAPTIVE SECURITY APPLIANCE

Cisco SecureX Intelligent Threat Defense and Secure Communications

The Cisco SecureX™ framework is a context-aware, network-centric approach to security that enables consistent security enforcement throughout the organization, greater alignment of security policies with business needs, integrated global intelligence and a much simplified delivery.

Cisco® threat defense solutions help organizations secure and manage their network environment so they are protected from today's dynamic threats, while reducing the time required to plan, build, and run complex security deployments.

Today, network administrators must constantly defend against threats and safeguard the network against attacks and intrusions. Corporate security infrastructures are stressed like never before with today's media-rich applications and increased collaboration, data traffic, and connection rates. The Cisco Adaptive Security Appliance Series 5500 (ASA) helps stop security attacks before they can affect business continuity by providing intelligent threat defense and highly secure communications services. These devices help organizations lower their deployment and operational costs while delivering comprehensive network security for networks of all sizes.

Migrating to the Cisco ASA 5500 Series

The Cisco Check Point to ASA Firewall Configuration Migration Service provides defined-scope, fixed-price support to organizations transitioning from Check Point firewalls to the Cisco Adaptive Security Appliance.

Cisco Check Point to ASA Firewall Configuration Migration service helps you quickly convert your firewall policies to simplify your migration to a Cisco Adaptive Security Appliance. The remote configuration migration service is available for:

- Check Point to Cisco ASA 5505 Firewall
- Check Point to Cisco ASA 5510 Firewall
- Check Point to Cisco ASA 5520 Firewall
- Check Point to Cisco ASA 5540 Firewall
- Check Point to Cisco ASA 5550 Firewall

Cisco Check Point to ASA Migration Service

Cisco can help you with your migration to the Cisco ASA with remote services that:

- Review your configurations and recommend improvements
- Support the migration process through knowledge transfer sessions
- Provide focused escalation support for critical migration change windows
- Review your plans for migration, testing, rollback, failure recovery, and risk mitigation and recommend improvements
- Support conversion of your Check Point firewall and IPsec VPN configurations to Cisco ASA configurations, using proven configuration best practices
- Provide guidance through firewall cutovers

Services from Cisco and Our Partners

Cisco Check Point to ASA Migration Services can be codelivered by Cisco and Cisco Security Specialized Partners. Some Cisco Security Specialized Partners also provide Check Point to Cisco ASA migration capabilities as part of their own value-added offerings. Contact your local Cisco Security Specialized Partner for information.

Other Security Services from Cisco

Contact your local Cisco account representative for information about other services to help you:

- Integrate SSL VPN, IPS, and content security into your security solution
- Extend the value of your investment in Cisco security technology

Cisco and Partner Expertise

Cisco security engineers and Cisco Security Specialized Partners are among the industry's elite in providing integrated, collaborative, adaptive solutions. Cisco security engineers typically hold one or more Cisco and security certifications and have deployed, secured, operated, and optimized the performance of many of the largest and most successful networks in the world.

Cisco Security Specialized Partners are recognized for their expertise in designing, installing, and supporting comprehensive, integrated network security solutions.
